

PROTECT AQUIFERS

STOP ASBESTOS CONTAMINATION

REDUCE TRAFFIC NOISE

PROTECT WILDLIFE

**Environmental Impact Statement (EIS) is a detailed report analyzing the potential consequences of a project. EIS should take into account costs to our environment, but also health and safety factors to people and our larger environment.

Past notable dates:

Sep 2020

Ranch Quarry started the pre-application process.

Nov 2020

Planning issued a finding requiring **DNR** and **Northwest Clean Air Agency** to sign-off on asbestos testing.

Feb 2023

Planning granted a **Determination of Completion**, even though **asbestos testing** has not been completed.

May 2024

Additional requirements were applied to the application.

Sep 2024

Planning issued a letter of intent to require an EIS.

Jun 2025

EA Science & Technology has been chosen as the EIS consultant.

Now Entering the EIS Phase**

Future action to watch for:*

Jul-Sep 2025
EA Science & Technology prepares for and initiates the scoping phase.

Oct-Nov 2025
Public comment period, 30 days. Speak to all environmental issues to ensure full review in scoping.

Next 1 - 3 Years
EA Science & Technology reviews comments, researches, and publishes the DEIS (Draft EIS).

Next 2 Years
Public Comment Period

Next 1 1/2 Year
EA Science & Technology reviews comments, researches, and publishes the FEIS (Final EIS).

Next 6 Months
Public Comment Period

Timing Varies
All decisions can be appealed by either party, which expands the entire process.

MAKE YOUR VOICE HEARD!

Public comments are the most effective way to influence decision makers.

*Timeline based on Siper-Goodwin Quarry, we will notify you when we hear from Planning.
